

DIMITRIS GALATSANOS

IT SYSTEMS ENGINEER | MICROSOFT 365 | INFRASTRUCTURE & AUTOMATION

Nea Moudania, Greece | galatsanos@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL PROFILE

IT Systems Engineer with more than 20 years of technology experience and current responsibility for IT operations in a high-availability hospitality environment. Combines Windows Server, Microsoft 365, networking, monitoring and incident response with hands-on PowerShell, Python and software development. Builds practical tools that improve service visibility, repeatability and operational resilience, while coordinating business teams, central IT, providers and vendors through complex incidents and change.

CORE EXPERTISE

SYSTEMS & CLOUD	Windows Server, Microsoft 365 administration, Entra ID, endpoints, accounts, access and security fundamentals
INFRASTRUCTURE	TCP/IP, VLANs, LAN/WAN, Aruba Central, Wi-Fi, switching, VoIP, printers and telephony
OPERATIONS	Zabbix, proactive monitoring, incident response, root-cause analysis, business continuity and technical documentation
AUTOMATION & DEVELOPMENT	PowerShell, Python, React, TypeScript, JavaScript, Flask, SQLite, Firebase, APIs and SPFx
LEADERSHIP & DELIVERY	Operational ownership, stakeholder communication, vendor coordination, documentation and continuous improvement

PROFESSIONAL EXPERIENCE

IT Manager

Jan 2024 - Present

Sani/Ikos Group | Greece

- Lead daily IT operations and infrastructure support for business-critical and guest-facing technology services in a 24/7 hospitality environment.
- Administer Windows Server, Microsoft 365, user access, endpoints, printers, telephony, network devices and operational applications.
- Develop PowerShell and Python automation for recurring checks, monitoring, notifications and support workflows.
- Drive root-cause analysis across switching, VLANs, Aruba wireless infrastructure, VoIP, WAN/ISP connectivity, property systems and third-party platforms.
- Coordinate incident response, restoration communication and technical documentation across business departments, central IT, service providers and vendors.
- Supported technology readiness and opening operations for Ikos Kissamos across infrastructure, network, endpoints, telephony, printing and applications.

IT Support Specialist

Mar 2023 - Dec 2023

Sani/Ikos Group | Greece

- Provided onsite and remote support for Windows endpoints, Microsoft 365, user access, networks, printers, telephony and line-of-business applications.
- Resolved escalated Wi-Fi, switching, VLAN, VoIP and peripheral incidents and documented repeatable troubleshooting procedures.
- Translated business-impacting issues into clear technical actions and coordinated timely service restoration.

SELECTED TECHNICAL PROJECTS

SharePoint Intranet Toolkit

Microsoft 365 enterprise intranet suite

Built a production-ready toolkit delivering 15 responsive SPFx web parts in one deployable package. Integrates SharePoint Online, Microsoft Graph and Entra ID for content, employee discovery, onboarding, compliance, recognition and engagement reporting, with PowerShell provisioning and governed access.

[SPFx](#) | [TypeScript](#) | [React](#) | [SharePoint Online](#) | [Microsoft Graph](#) | [Entra ID](#) | [PowerShell](#)

TableMaster

Hospitality ordering and table operations

Developed a full-stack Flask platform for tables, reservations, orders, VAT, payments, audit records and ESC/POS network printing, including persistent retry queues, backups, PWA support and controlled licensing.

[Python](#) | [Flask](#) | [SQLite](#) | [ESC/POS](#) | [APScheduler](#) | [PWA](#)

PingOS

Network monitoring and operational alerting

Created a Python and PyQt5 desktop application for concurrent host monitoring, latency and packet-loss tracking, state-aware notifications, searchable history and operational reporting.

[Python](#) | [PyQt5](#) | [QThread](#) | [SQLite](#) | [SMTP](#) | [Microsoft Teams](#)

LearnPython.ai

Interactive programming education

Designed a bilingual browser-based learning platform with structured lessons, immediate code execution, contextual tutoring and a mobile-optimized learning experience.

ADDITIONAL LEADERSHIP

Founder, Editor and Platform Administrator

Jan 2019 - Present

Respawn.gr / Joystickgr | Greece

- Lead the editorial, technical and operational lifecycle of an independent Greek gaming publication.
- Administer a custom React frontend and CMS with PWA functionality, contributor access, publishing workflows, deployments and ongoing platform improvements.

EDUCATION & CERTIFICATIONS

Hellenic Open University | Undergraduate studies in Computer Engineering, in progress since October 2022

Microsoft: MS-102 Configure Your Microsoft 365 Tenant; Manage Your Microsoft 365 Tenant; Security, Compliance and Identity Fundamentals learning credentials

Additional: Python Essentials 1

LANGUAGES

Greek: Native | English: Professional working proficiency

PROFESSIONAL STRENGTHS

OPERATIONAL OWNERSHIP	Manage issues from first report through full restoration and follow-up.
CLEAR COMMUNICATION	Translate technical conditions into business impact and practical next steps.
STRUCTURED IMPROVEMENT	Turn recurring operational friction into documented, repeatable solutions.
CROSS-TEAM DELIVERY	Coordinate departments, central teams, providers and external partners.
